Subject: FYI: Expedited Settlement Agreement taken against JCI Jones  
Chemicals in Tacoma

Tom,

The Risk Management Program (under Section 112(r) of the Clean Air Act) has recently begun using our new 2004 Expedited Settlement Agreement to quickly get those facilities that have hazardous/toxic chemicals over a certain threshold into compliance. The ESA is used for facilities that have a Risk Management Plan (i.e., a checklist that indicates that their program is complete) but upon inspection the program has deficiencies that amount to penalties less than \$7,500.

We have just recently mailed an Risk Management Program ESA to **JCI Jones Chemicals located in Tacoma, WA** for \$5,925. Please contact me with any questions or concerns.
